

CC-16.-K

Network Type : MV

Unipolar voltage detector for elbow connectors with capacitive divider 10-30 kV

Application:

- Unipolar voltage detector for elbow connectors with capacitive divider.
- Maximum operating voltage: 30 kV network.

Features:

- Voltage range : 10 to 30 kV.
- The shape of the contact electrode removes the cap from the separable connector.
- Signalisation :
 - 1 red LED (voltage presence);
 - 1 green LED (stanby state);
 - Timed audio signal.
- Function check by pressing the TEST button:
 - Switch on by flashing red LED
 - Triggering of the clocked sound signal
- Fixing on insulating stick by universal notched tip type "K".

Composition:

- Supplied in a hard case.

Optional accessories:

- Insulating stick: [CC-45-K](#)
- Stick bag: [CM-1-10](#)

Référence	Description	Voltage range	Frequency	Weight (kg)
	Fitting			
CC-161-K	K	10 - 30 kV	50 / 60 Hz	0,820
