

Bipolar DC voltage detector 600-2000 V. Probe Ø8 mm. Clamp. Cable 2.5 m.

Application:

System for verifying the absence of voltage on a 600 V to 2,000 V DC-powered network:

- · Presence of voltage indicated by the lighting up of 6 red LEDs and the emission of an audible signal.
- Function control of the integrated device which validates all detector functions. :
 - 1. Contact the handle's magnetic shoe with the rail and shunt the assembly by making contact between the magnetic handle and the contact hook:
 - 2. Press the test button: 6 red LEDs light up, audible signal sounds;
 - 3. Release the test button: momentary illumination of the 6 green LEDs.

Features:

This system consists of:

- Acoustic and luminous 600-2,000 V DC voltage detector with stick;
- 8 mm diameter contact tip electrode;
- Rail contact clamp;
- 2.5 m connecting cable;
- Soft case.
