

CL-465-...

Network Type : MV

Voltage detector for high voltage substation 10-36 kV

Application:

- Luminous Absence of Voltage Checker for MV substation.
- Maximum operating voltage: 36 kV.

Features:

- Built-in function control device.
- Robust molded thermoplastic housing providing excellent impact protection.
- Interchangeable V-shaped contact electrodes.
- End fitting: C (hexagonal 12 mm).
- 360° visual indication by means of a high visibility red LED.
- Lithium battery with 8 years autonomy in standard use.

Référence	Description	Dimensions	Voltage range	Weight (kg)
	Fitting	Length (mm)		
CL-465-10/36-C	C	270	10 - 36 kV	0,4
