

MS-920-..

Network Type : LV

Voltage detector 12 to 690 V AC with phase rotation. Probe Ø2 mm. L: 19 mm. LCD.

Application:

- Check the presence of voltage.
- Voltage measurement: up to 690 V AC and 950 V DC.
- Audible continuity test (< 100 Ω).
- Phase pole identification.
- DC polarity identification.
- Phase rotation check (2 lead method).

Features:

- Test lead points Ø 2 mm L: 19 mm.
- Three digit colour LCD screen display (red and blue).
- Push-button for the self-test and for the continuity test (100 Ω).
- Indicator light when voltage is dangerous (> 50 V).
- Completely modular and adjustable using type E plugs.
- Lighting feature to light on the working area.

Optional accessories:

- Carrying bag with belt loop, Ref. [M-87285](#).
- Holder, Ref. M-952325.

Référence	Dimensions	Frequency	Weight (kg)
